Type: ROUTINE INSPECTION

Date: Feb-26-2010

**3.129 (a)****FEEDING.**

Section 3.129 Feeding. The food shall be wholesome, palatable, and free from contamination and of sufficient quantity and nutritive value to maintain all animals in good health. The diet shall be prepared with consideration for the age, species, condition, size, and type of the animal. Animals shall be fed at least once a day except as dictated by hibernation, veterinary treatment, normal fasts, or other professionally accepted practices.

- The licensee was not following the diet plan approved by the attending veterinarian. The plan stated that OASIS Prime Cal would be used as a supplement at 7grams per 100 lbs. The licensee was using two products labeled for human use at the following dosage: four 500 mg Calcium tablets and one multi-vitamin per animal per day. Dietary insufficiencies may lead to long-term metabolic disturbances that can affect the health of these animals. The diet plan must be reviewed by the attending veterinarian and then followed by the licensee.

To be corrected by: March 26, 2010.

This inspection and outbriefing was conducted at the Tulsa State Fairgrounds by the licensee, Mike Tygart, Veterinary Medical Officer, and Jeff Baker, Veterinary Medical Officer.
